

We all
enjoy going
to the
beach. It
looks so
beautiful

But not
when it
looks like
this!

Where does
the rubbish go,
when you go
home?

It goes into the
sea

52% of sea turtles
have eaten plastic
rubbish in the ocean

90% of Seabirds eat
plastic by mistake

20% of fish have been
found to have plastic in
their stomachs

Recently a Pilot Whale was found with 40 carrier bags in his
stomach

Shocking Plastic facts

1 Million Plastic bottles are brought around the world every minute

Not all Plastic are recyclable

8 Million tons of plastic go into the oceans every year.

In 2050, scientist think that the amount of plastic in the ocean will weigh more than the amount of fish

Plastic kills 1.1 Million seabirds and animals every year

700 marine life species are facing extinction

2 Million plastic bags are used every minute.

A plastic bag is used for around only 12 minutes

480 billion plastic straws were used across the world in 2016

How can we help our sea life?

Use a reusable bag for shopping

Don't use plastic straws

Use a reusable drinking bottle

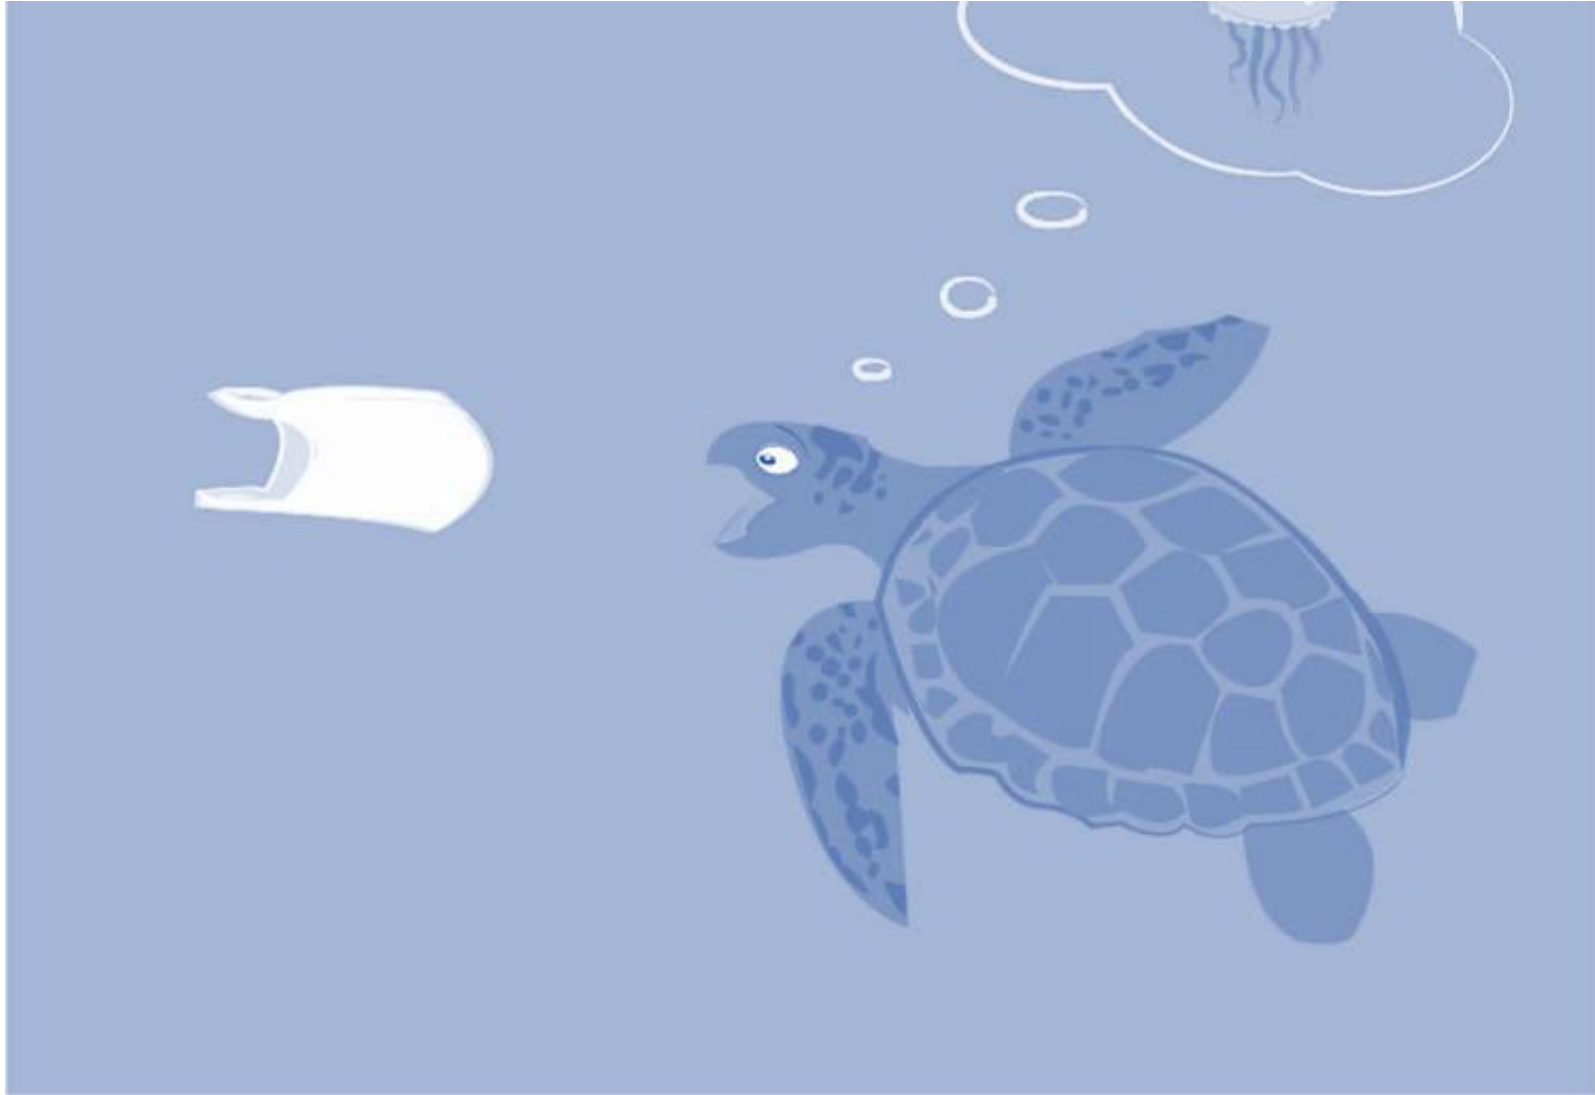

Recycle your rubbish

Use a reusable net bag for fruit and veg

Always throw your rubbish in a bin

save our
beautiful
sea
creatures
